

I can get real time updates listening to XM Satellite Radio and its traffic and weather channels. If I just miss the traffic on regular radio, I have to wait 15 minutes or an hour before hearing it again. I don't have that wait with XM, it's real time. Satellite radio provides variety and quality that are not available on the average radio station, and, I can listen to the same channel from one destination to another without losing reception. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear, it's un-American to even think I could be restricted. Please reject the NAB's petition 04-160 and support XM's ability to provide the kind of programming that I demand and deserve as an American.
